# HANDMADE AND BRITISH FROM START TO FINISH

We have more than 160 years' experience, crafting beautiful ironwork under the same roof in Walsall where it all began back in 1855.

## OUR HISTORY

Our business was founded by William Kirkpatrick, Esq. J. P. (1817-1887) in Walsall in 1855, and carried on for many years in his name and direction.

His son, Vincent Kirkpatrick, succeeded his father and presided over the incorporation of the business as a Limited Company in 1901. Upon incorporation, many loyal and long serving employees were given a shareholding, starting a tradition which continues to this day.

Many of the descendants of those first shareholders still retain their interest in the Company and the Kirkpatrick family still also retain a shareholding.

### Adapting to change

While looking back through our large collection of product catalogues dating back to the 19th century, much of our present window and door furniture remains true to our roots and has changed little over the past 160 years.

But we've not stood still - apart from during both World War I and II, when production was interrupted to concentrate on the war effort, we've been constantly evolving to reflect changing tastes, fashions and technology. For example, many of our window fasteners now include secure locking mechanisms and we also supply products to suit modern UPVC windows and doors.

### The last UK foundry

In the mid-20th century there were many jobbing foundries in the Midlands and the Black Country, however most have fallen by the wayside owing to increasing international competition from India and the Far East.

As a result, we are immensely proud to be the only manufacturer of traditional black ironmongery left in the UK who genuinely pours their own metal.

Our continued success is due to the world-class quality of our genuinely hand-made products and our ability to adapt and develop our range to suit the needs of an ever changing world.

## FROM POURING TO PACKING...

...each stage is performed by our own fair hands – making us the only ironwork company whose products are genuinely handmade in Britain from start to finish.

### STAGE 1 PATTERN MAKING

Dave gets the ball rolling by creating the distinctive patterns from which every Kirkpatrick product is born.

### STAGE 2 MOULDING

Chris skilfully makes the moulds by pressing the patterns into a special box filled with black sand.

### STAGE 3 MELTING

Paul adds pig iron to the induction furnace, which is heated to a melting point of 1,200 °C.

### STAGE 4 COLLECTING

Kevin collects the molten iron as it is poured from the tipped furnace into pre-heated pots.

### STAGE 5 POURING

Ransford needs a steady hand to evenly pour the molten iron into different moulds.

### STAGE 6 COOLING

David removes the heavy weights from moulds (which stop the iron exploding) and it begins to cool.

### STAGE 7 REMOVING

Dave moves the moulds and taps off the sand, to reveal the fresh new casting underneath.

### STAGE 8 SHOT BLASTING

Stuart puts the castings with metallic shot into a barrelling machine to smooth away rough edges.

### STAGE 9 ANNEALING

Mark places the castings into pots which are heated to 1,000 °C – making the iron strong yet malleable.

### STAGE 10 SORTING

Martin takes the castings, which have undergone further shot blasting, and separates each into storage boxes.

### STAGE 11 GRINDING

David grinds away the rough edges and unwanted seams to give the castings a smarter finish.

### STAGE 12 FILING

Bill completes the smoothing and rounding of each individual piece with a quick file down.

### STAGE 13 DRILLING

Sandra hand drills individual holes on each casting for accuracy and to give a high quality, durable finish.

### STAGE 14 ASSEMBLING

Dave assembles a range of our products by attaching, hammering and expertly screwing them together.

### STAGE 15 DIPPING

Michael makes sure the castings never rust by hanging and dipping each one in protective paint.

### STAGE 16 COATING

Dean sprays our products with a powder coating for a great finish, before baking them again for extra durability.

### STAGE 17 PACKING

Tracy makes sure every product is packed with the same care and attention that goes into making them.

### STAGE 18 SENDING

Mark works hard to ensure every customer receives their Kirkpatrick products in good time.

### STAGE 19 ENJOYING

It takes over six weeks to create every Kirkpatrick product, each providing a lifetime of enjoyment.

## WHY CHOOSE US?

We believe our 160-year tradition for producing handmade ironmongery, utilising the skills of our local workforce, gives Kirkpatrick products a style, authenticity and longevity that cannot be matched by less expensive, poor quality imitations.

It is a combination of our experience, expertise and dedication to producing ironwork of the utmost character which means that you will not find better quality or value anywhere else in the world.

### **Our heritage**

Much of our black iron door and window furniture is based on patterns (designs) used by our foundry since its inception in the 19th century. Our workforce today uses essentially the same finishing and assembly techniques as back then, which have been handed down and refined through generations.

It's this history which helps us create durable and beautiful ironwork products that have an integrity and authenticity which is second to none.

### **Our craft**

Each and every piece of our ironmongery is lovingly crafted by hand over a six week period, ensuring each door handle and window latch is unique and lovingly created to provide strength and quality which will last a lifetime.

Added to this, we react quickly and efficiently to our customer's needs, and are able to produce new fittings that perfectly match the style and character of old buildings.

### **Our promise**

We keep most of our products in stock and aim to deliver within 48 hours. So if you're trying to find a match for existing traditional ironwork or perhaps want to fit out a stylish new barn conversion, we're sure to have what you need.

We can supply everything from door and window furniture to coat hooks and shelf brackets, but if you can't find what you are looking for please get in touch as we are also able to create bespoke, one-off pieces to suit your exact needs.

### **Our authenticity**

We use malleable iron, because it is stronger and more durable than imported alternatives. This authenticity, coupled with the high quality of our products has made us recognised leaders in our field.

We're proud to be the only traditional ironmongery manufacturer able to use the Made in Britain logo. Why buy a traditional British product steeped in history from India or China?

### **Our guarantee**

We are proud of our heritage and the quality of our malleable iron products. Crafted to the highest standards using traditional manufacturing processes we are confident that you cannot buy a better quality product.

Care instructions are included in each product and by adopting this simple advice you can help ensure that Kirkpatrick Ironmongery will remain highly decorative and will last a lifetime.

### **Our green creds**

Although we are a traditional company, we're always looking for ways to improve our efficiency and therefore our environmental impact – so we've invested in reducing our energy consumption which has helped us save 250 tonnes of carbon each year since we upgraded our processes.

Our factory emissions are minimal and regularly tested to ensure we comply with the Environmental Protection Act and as a result – our carbon footprint is lower than many of our competitors who use foundries in unregulated countries and whose products have been imported into the UK.

## RANGES

### BLACK IRON

Our Black Iron range is the largest available anywhere in the world. Pieces range from traditional to contemporary in style in an Antique or Smooth Black Iron finish, with other finishes available on certain products. *(See page 10)*

### CAST BRASS

Our Cast Brass range is modelled from select pieces from our Black Iron range, which are made entirely from brass so the manufacturing process used differs from our black iron pieces. The component parts are highly polished before assembly and then have a tough lacquer applied to protect the product. *(See page 92)*

### BLACKSMITH FORGE

Our stylish new Blacksmith Forge range has been inspired by the iconic Gothic architecture of the late medieval period. It includes both door and window furniture, plus other fittings, and comes in a flat matt black or Argent finish to suit both traditional and contemporary-styled homes. *(See page 82)*

### RAWNSLEY

The Rawnsley range is based on ornate patterns rescued from a foundry on Cannock Chase which closed in the early 1980s. Some of the patterns are also to be found in old Kirkpatrick catalogues. The Rawnsley range is available in Black, Pewter and Argent finishes. *(See page 102)*

## FINISHES

### AB ANTIQUE BLACK

A stippled and slightly glossy black iron finish gives our products a unique texture. This is achieved by using antique style castings and the application of our tough powder coat protection. Products which have moving parts are also subjected to a prior coat of paint for additional protection.

### SB SMOOTH BLACK

A smooth matt textured, black iron finish. Although many products look similar to those with an Antique Black finish these differ because we use a smooth style pattern. The same paint and powder process as Antique Black is generally used.

### A ARGENT

Argent has a slight stippled 'naked' silver metal finish which creates subtle highlights in differing lights. It differs from Pewter in that it is a bare metal finish with a coat of clear lacquer applied for protection.

### P PEWTER

Our Pewter finish is achieved by using a different colour final coating to give a long lasting Pewter effect. This finish is available on all products.

### B BRASS

Our original and authentic patterns are used to produce our Cast Brass range, and after casting the components are polished and then assembled by hand, finally finished with a tough lacquer to offer protection against corrosion.

# BLACK IRON RANGE

- 12 Door and gate furniture
- 60 Gate fittings
- 62 Window furniture
- 72 Cabinet and drawer furniture
- 76 Home accessories

**Cylinder 6000**  
Black double cylinder or thumb turn and  
single cylinder. Keyed alike, keyed to differ or  
master keyed. Odd sizes available in multiples  
of 5mm. Please ask for details.

**1977**  
House numerals and letters – 50mm (2")  
**1976**  
House numerals and letters – 45mm (1 3/4")  
**1979**  
House numerals and letters  
50mm (2"), 76mm (3") 101mm (4"), 152mm (6")

**1855**  
Old English style name plates. Gold on black.  
This is an approximate guide as capitals are larger than lower case letters and  
spaces must be allowed for between words. Our pattern shop will make your  
individual plate on the most appropriate size for the best results. For longer names  
it may be better to use two plates alongside each other or one above the other.  
**777**  
Also available in gold on black. Supplied with chain (not shown)  
368 x 73mm (14 1/2" x 2 7/8")

## LEVER HANDLE LOCK TYPES

### Lock

A traditional key operated locking system.

### Latch

A handle operated, spring loaded tongue which 'clicks' shut, holding the door closed but not locking it.

### Bathroom

A turn and release locking system which allows the door to be locked and unlocked from one side only for privacy without the use of a key.

### Euro cylinder

A keyhole shaped lock barrel which fits into an appropriately shaped hole within the door and its handle.

### Oval lock

Very similar to a euro cylinder but with an oval rather than keyhole shaped barrel.

Lock

Latch

Euro cylinder

## THUMB LATCH TYPES CRANKED OR STRAIGHT?

### Cranked

The handle is offset to one side slightly to accommodate for a left hand or right handed door. Sometimes the actual thumb lever can be off-set also.

Straight

Cranked

## BOLT TYPES CRANKED OR STRAIGHT?

### Straight

The bolt sits on the same plane as the bolt fixing.

### Cranked

A cranked bolt is angled out like a step to allow it to fix in position at a 90 degree angle to the actual bolt.

Straight

Cranked

## DOOR KNOBS/LOCKS MORTICE OR RIM?

### Mortice

A mortice knob can be turned to operate a tongue latch within the door that slots into a mortice (hole) in the door frame, holding the door closed or releasing it.

### Rim

A rim knob sits on top of a rim latch or rim lock box, which is mounted onto the face of the door. Turning the knob operates a tongue latch inside the box which slots into a keeper on the door frame, securing or releasing the door.

Mortice

Rim

## WINDOW FASTENINGS HOOK OR MORTICE?

### Hook

A hook fastening slots into a protruding hook attached to the window frame.

### Mortice

A mortice fastening fits into a recess in the window frame.

Hook

Mortice

# AND FINALLY...

## BESPOKE ITEMS

With our many years' experience of casting malleable iron we have the capability to make bespoke items to replace unique items which are no longer available.

This service is typically used when renovating listed buildings. To do this we would normally require a sample of the existing product so that we can produce a new pattern from which to make a casting.

## REFURBISHING

Iron products are very durable and can last for many years. If a listed building is being renovated there is very often the option to re-use the original ironmongery.

However, although the actual product is still functional and strong it is often the case that it has been painted over several times and its original beauty has been lost.

We have the capability to restore such products to their original glory by using the skills and techniques built up over 160 years.

## TAKING CARE

Metal in most forms is susceptible to corrosion. Depending upon their function our malleable iron products are subjected to either a one or two stage coating process followed by stove drying to form our durable and hard wearing traditional finish.

Over time the finish can be affected particularly where moving parts rub together. To protect your ironwork we recommend that any moving parts are lightly oiled prior to fitting. We also recommend wiping the products with a lightly oiled cloth from time to time to remove any harmful deposits and reapplying a small amount of oil to moving parts. This is particularly advisable if located near the coastline. We would recommend a three-in-one or WD-40 type lubricant.

If the protective coating is damaged or chipped in any way, a Hammerite type paint should be applied to maintain protection against corrosion.

By adopting this simple advice you can help ensure that your Kirkpatrick products will remain both functional and decorative and will last a lifetime.
