VITREOUS ENAMEL SURFACES
FOR THE FIREPLACE

VLAZE.CO

VLAZE: a range of vitreous enamel fireplace surrounds, heat shields and hearth plates that offer a unique functional finish that is striking and tactile.

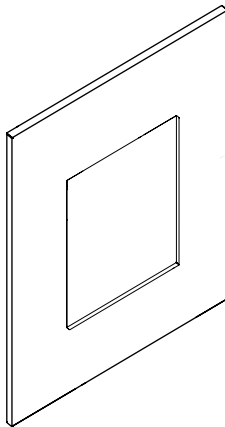

The vitreous enamel surface is created by fusing powdered glass to steel at temperatures in excess of 800°C. The result is a luxurious vibrant glaze that is heatproof, non-porous and stain resistant.

VLAZE is British made by A.J Wells Architectural Enamel, makers of the iconic signage for the London Underground.

FIREPLACE INSERT SURROUNDS

VLAZE insert surrounds are made to measure in one piece to fit around any insert stove preventing cracking and discolouration on the chimney breast. Vitreous enamel insert surrounds feature a slim 6mm radius edge and are insulated with fire rated fibreboard. Boasting heat resistant and anti-static properties your fireplace surround will stay looking clean and sharp.

Insert surround: Mini Moderns Whitby in Washed Denim

WALL MOUNTED HEAT SHIELDS

VLAZE wall mounted heat shields are designed to be hung behind a wood burning stove creating a focal point that not only enhances the fireplace but allows the stove to be placed close to the wall behind. When installed the shield reduces the stoves distance to a combustible material by half and in the case of Charnwood appliances down to just 100mm. The vitreous enamel panel features a dual skin that provides thermal protection and an effective convection system that distributes heat back into the room.

Using a rail mounted system the heat shield is quick and easy to install and is available in 3 sizes to suit most freestanding stove models.

800 x 1200 **S**

800 x 1800 **M**

1100 x 1800 **L**

Heat shield: Basalt

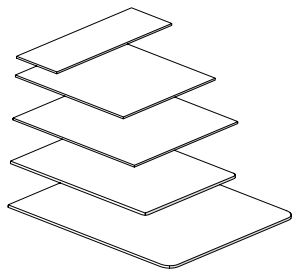

HEARTH PLATES

VLAZE vitreous enamel hearth plates create a clean, modern platform on which to stand your stove. An excellent alternative to glass or polished stone they can be used on their own or alongside our heat shields and insert surrounds for a seamless floor to wall solution.

The smooth gloss surface finish is heat resistant, easy to clean and maintain and is available in the full range of colours, overlays & designer patterns. Each hearth features a smooth radius edge and is insulated with fire rated fibreboard to take the heat and weight of the stove while still being light to handle.

The hearth plates are available in 5 sizes to suit most stoves and boast a 12mm depth conforming to UK building regulations for non constructional hearths.

1000 x 300 x 12

COOKER SPLASHBACKS

VLAZE offer a wide range of standard sized splashbacks to fit most kitchen cooking appliances. With deep rich colours vitreous enamel possesses ideal qualities for kitchen wall surfaces - durable, hygienic and completely heatproof.

The splashback can be installed within minutes with minimal preparation and requires no grouting. The enamel finish also doubles up as a magnetic pin board and wipe-clean whiteboard. An innovative alternative to tiles that is both practical and timeless.

VLAZE also offer a bespoke kitchen worktop and upstand service. Please contact us for further details.
